PERSONAL SKILLS INVENTORY

Skills Developed	Challenge	Action taken	Results	Self-reflection/ Key takeaway
Adaptability (e.g challenge faced in an internship; situation where you handled a lot of pressure; time you failed)	In Intermediate, I was so poor in M3 that I was not able to understand the concepts of any topic.	I studied hard and joined the coaching to clear my concepts in M3.	After that, I studied hard and cleared my exam with a good percentage.	From this I learnt that if we work hard then we can achieve our goals.
Analytical (e.g project where you had to perform detailed research and analysis)	In my final year project done on IOT app project, there is a challenge to understand the IOT components.	I think about how can we learn IOT and I done research on google.	Finally, I found the good information in google and I implemented it.	By this project, I learnt how to use the IOT devices and useful in real-life
Communication (e.g convince someone of your idea, present complex information, get your point across)	Our college organized a donation for child welfare, but no one wanted to donate money.	I convinced my classmates to donate to a child welfare fund for the development of needy children.	After I collect a good amount to donate in child welfare.	I consider myself to be able to convince people to understand my thoughts.
Problem-solving skills (e.g talk about a problem/obstacles faced to reach a goal and how you solved it)	In my BE first year, I had a task to build a mini project but I had zero knowledge of project building.	I decided to learn programming to build my project and also learned how to make website.	Finally, I built my first website project which is a Library management system	By this I learnt how to make website and how to solve the problem.
